

Ab No	Specialty / Division	Presenting Author	Abstract Title
<b>Poster Session I: Basic Science &amp; Transla Poster Session 12:55 – 13:55 Charimen: Prof Aimin Xu &amp; Dr Eric Tse</b>			
11	Haematology	Chi-Wai Cheng	Peptidyl-prolyl isomerase (PIN1) promotes DNA double-strand break repair through regulation of the phosphorylation of ataxia telangiectasia mutated (ATM) protein
14	Haematology	Yiu-Ming Ng	Cyclin-dependent kinases regulatory subunit 2 (CKS2) counteracts CKS1 to regulate degradation of p27
15	Nephrology	Wai-Han Yiu	Tissue kallikrein mediates pro-inflammatory pathways and activation of protease-activated receptor-4 in proximal tubular epithelial cells
22	Nephrology	Ruixi Li	Role of bone morphogenetic protein-7 (BMP7) in diabetic nephropathy
30	Haematology	Xiangguo Shi	The Role of inka1b in Zebrafish Hematopoiesis
32	Rheumatology	Chun-Yee Tam	A Novel C-type Lectin Receptor, CLEC16A, and Systemic Lupus Erythematosus
47	Endocrinology	Baile Wang	The role of hypothalamic APPL2 in regulation of energy metabolism
52	Endocrinology	Kenneth Cheng	Ablation of APPL2 in pancreatic $\beta$ -cells causes defective insulin secretion
56	Endocrinology	Jimmy Lee	Lipocalin 14 - A Novel Adipokine potentially protects mice from diet-induced diabetes
17	Haematology	Harinder Gill	Sorafenib combined with azacitidine is an effective post-remission therapy for FLT-ITD <sup>+</sup> acute myeloid leukemia
<b>Poster Session II: Clinical Research Poster Session 12:55 – 13:55 Chairmen: Dr KH Chan &amp; Dr James Ho</b>			
62	Neurology	Sonny Hon	Trend of endovascular angioplasty and stenting in treating extracranial cerebrovascular steno-occlusive disease
06	Clinical Pharmacology	Ching-Lung Cheung	The relationship between glucose metabolism, metabolic syndrome, and bone-specific alkaline phosphatase: A structural equation modeling approach
67	Neurology	Jacky Lee	Myasthenic crisis in patients with generalized myasthenia gravis
35	Geriatrics	Tuen-Ching Chan	Association between body mass index and cause specific mortality as well as hospitalization in Chinese older adults with multiple comorbidities
40	Gastroenterology & Hepatology	Victoria Tan	Gastro-Oesophageal Reflux Disease - a Decade later: Rising Population Prevalence in a Chinese Population
42	Endocrinology	Yu-Cho Woo	Primary aldosteronism: Identifying suitable cases for confirmatory test
58	Cardiology	Zhe Zhen	Relationship between diabetic retinopathy and subclinical myocardial dysfunction in patients with diabetic mellitus
59	Gastroenterology & Hepatology	Kevin Liu	New High Definition Narrow Band Imaging versus Conventional High Definition White Light Colonoscopy for Detection of Colorectal Adenomas: A Randomized Controlled Trial with Tandem Colonoscopy
70	Gastroenterology & Hepatology	Wai-Kay Seto	Interim analysis of hepatitis B reactivation in patients with prior HBV exposure undergoing rituximab-containing chemotherapy: a prospective study
75	Cardiology	Yan Chen	Assessment of Carotid Intima-media Thickness in Patients with Axial Spondyloarthritis: Relationship with Disease Severity
